ORDNANCE, MUNITIONS & EXPLOSIVES

LEVEL 4 TECHNICIAN APPRENTICESHIP

Institute of
Explosives
Engineers

VOICE OF THE EXPLOSIVES INDUSTRIES

forging your future career

Modules covered within the programme:

- Study Skills
- Electrical and Electronic Principles
- Principles of Systems Engineering
- Chemistry of OME
- Instrumentation and Control
- Mathematics
- Physics of OME
- Signals and Systems
- Principles of OME

OME Technician Apprenticeship

Funding is now available for an OME Technician Apprenticeship (level 4) which will be delivered by the University of Wales Trinity Saint David, Swansea at the new SA1 Innovation Quarter (IQ) campus.

- Apprenticeships are a great way to gain hands-on experience while studying towards a HNC level qualification and earning a wage.
- You will be in employment and will study using a flexible study method agreed between the university and your employer.
- Your tuition fees and training costs will be fully funded.
- Apprenticeships are all-age programmes with no upper age restrictions.
- Delivery of Knowledge, Skills and Behaviours is a combination of university attendance (off the job training) and training with the employer (on the job training).
- A total of eight weeks per academic year will be required either at university, via blended learning or employer-based specialised training. Plus focused assignment and project work outside those times in conjunction with your employer.

OME technicians can carry out a range of technical, engineering and scientific activities which may include laboratory-based investigations, explosives range testing, engineering studies and scientific experimentation in their specialist field.
